DOWNLOAD METER

Download Meter is a very useful but simple to install script. With this product you will be able to accurately monitor the number of downloads made from your site and silently track the location that the download request comes from. You will also have the ability to promote your backend product offers, affiliate programs or newsletters.

Here's how to Install it on your server:

1. Open dl-template.tml in your html editor and customize it to suit your requirements. (Your other promotions or a thankyou message etc.)
2. Create a folder on your host called what you wish (ie dlmtr) and then CHMOD it to 777

3. Upload files dl.php, index.php, login.php, title.jpg, admin.tml & dl-template.tml
4. Type in the address to to the login.php file
ie <http://www.mysite.com/dlmtr/login.php>
5. Setup your password

That's all you need to do to install the script properly.

The Script In *Action*:

When linking to your downloads, instead of linking like

<http://www.mysite.com/file.zip>

use

<http://www.mysite.com/dlmtr/dl.php?url=http://www.mysite.com/file.zip>

That will then track the downloads for that file. To view your stats simply point your browser at the login page <http://www.mysite.com/dlmtr/login.php>

Master Resell Rights-Download Meter

You've purchased a script with Master Resell Rights.
